

Wingate University Health Center
COVID-19 Testing and Payment Responsibility FAQs (Student Version)

1. Can I get tested for COVID in the Health Center even if I do not have symptoms and have not been exposed to a person under investigation for or who has tested positive for COVID?
 - *Yes, as long as testing supplies are readily available. Insurance will be filed for all testing. Any amount not covered by the student's insurance will be billed to their student account.*
2. If I have symptoms of COVID and need testing, do I have to pay for the test if I am tested in the Health Center?
 - *The Health Center will bill the cost of the test along with the cost of the visit to your insurance company. Any portion of the visit not paid by insurance will be the responsibility of the student. All unpaid charges will be billed to your student account.*
3. What if I am exposed to someone with COVID while on campus? Can I be tested in the Health Center and is there a cost even if I don't have symptoms?
 - *Yes, you can be tested in the Health Center. The Health Center will bill the cost of the test and visit with the Provider (if necessary due to COVID-like symptoms) to your insurance company. Any portion of the visit not paid by insurance will be the responsibility of the student. All charges will be billed to your student account.*
4. If the Health Center is not in-network with my insurance company, can I still get tested?
 - *Yes. If Wingate is not considered an in-network provider with your insurance company, the cost of the office visit and test will be billed to your student account.*
5. What if I am required to get tested to return to work or to participate in any other non-university function, can I get tested in the Health Center?
 - *Yes, but the cost of the test would be the responsibility of the student. Most insurance companies do not cover the cost of asymptomatic testing. The cost of the test would be billed to your student account.*
6. Can I get tested in the Health Center to determine if I have been infected with COVID in the past (antibody testing)?
 - *Yes, as long as supplies are available, but the cost of the test would be the responsibility of the student. Insurance companies do not cover the cost of this test. The student's account will be billed for the cost of the test.*
